## SUMMARY

I am a Computer Engineering Student who has a strong interest in Web Development, including front-end and back-end technologies, looking for opportunities in events or social activities to expand my network. Experienced in working under pressure, passionate about exploring the latest web trends and technologies, and highly motivated. I excel at collaborating with others to achieve objectives with excellence.

## EDUCATION

**Bachelor of Computer Engineering**  
*Institute Technology of Sepuluh Nopember*

Surabaya, Indonesia  
*August 2021 - now*

## PROJECT

**TEDxITS 2023**  
*Frontend website developer*

Surabaya, Indonesia  
*February 2023 - September 2023*

- Ensure the website is mobile-responsive, allowing users to access and engage with the content seamlessly across various devices, enhancing the reach and accessibility of the TEDxITS 2023 campaign.
- Create a user-friendly interface that allows seamless navigation, making it easy for visitors to access information about the speakers, their profiles, and the thought-provoking topics they will be addressing.
- Develop a visually captivating website that effectively showcases the TEDxITS 2023 event, emphasizing the theme, date, time, and venue to generate excitement and anticipation among visitors.

**PETROLIDA 2024**  
*Website developer*

Surabaya, Indonesia  
*October 2023 - now*

- Created a website that serves as a platform for students to delve into energy-related challenges and acquire valuable competitive experience.
- Created a website with registration capabilities for competitions, talks, and tours, enhancing accessibility to these valuable features.
- Create an engaging website that visually highlights the PETROLIDA 2024 event, with a focus on the theme, date, time, and location, aiming to build excitement and anticipation among its visitors.

## WORK

**Olympiad of Biology ITS 2023**  
*Lead website developer*

Surabaya, Indonesia  
*July 2023 - September 2023*

- Led and supervised website making consisting of UI UX Designer, Frontend Developer and Backend Developer.
- Design an engaging landing page that will capture the user's attention and encourage them to explore the website further. 2023 event, emphasizing the theme, date, time, and venue to generate excitement and anticipation among visitors.
- Manage registration form for the Olympiad and provide the user and admin dashboard.

**Sheeka**                                                                                  Surabaya, Indonesia
*Frontend website developer*                                                                   *August 2023*

- Develop a captivating Sheeka landing page designed to engage and inform visitors about the brand. The page will seamlessly redirect users to Sheeka's marketplace.
- Create informative product pages that showcase Sheeka's offerings. These pages will provide details and redirect users to specific marketplaces for easy access.
- Implement smooth redirection mechanisms from the landing and product pages, ensuring a user-friendly journey, enhancing brand visibility, and boosting marketplace traffic.
